

Oakmont Clubhouse/Office Project Update

The Board has been working with the architect and contractor to develop a revised plan for remodeling the Office area. The revised plan provides improvements that benefit both the Members, and office staff, and is being done within the existing structure of the Oakmont Clubhouse. Since there is a cost benefit to the Association to do both the Oakmont Room and Office remodel concurrently, the start of the remodel has now been rescheduled to begin in early 2020. Therefore, all RAAC and Club activities planned prior to 2020 will not be impacted. As the Board moves closer to developing a firm schedule with the contractor, all the parties affected by closure of the Oakmont rooms will be given sufficient notice in order to reschedule activities and events planned for early 2020.

Once the revised plan for remodeling the Office area is available and the Board has updated cost information from the contractor, meetings will be scheduled to present the revised information to the Members. The Board appreciates your understanding and patience and is confident that once the remodel is completed, you will be pleased with the enhancements to our Clubhouse.
