

Dear Solera Residents,

On Sunday, March 15th, Governor Gavin Newsom called for Californians who are 65 and older, as well as those experiencing chronic disease, to immediately home isolate themselves.

“Each of us has extraordinary power to slow the spread of this disease. Not holding that concert or community event can have cascading effects — saving dozens of lives and preserving critical health care resources that your family may need a month from now. The people in our lives who are most at risk — seniors and those with underlying health conditions — are depending on all of us to make the right choice.”

As **Coronavirus (COVID-19)** continues to be a concern worldwide, the Solera Board and Management has made the difficult decision, given the circumstances and information available to us, to cancel all of our community programs and close facilities through April 6th. This includes the pool, spa and gym facilities. The mailroom will remain open.

At this time, the office will remain open to handle the business of the Association by email, web messaging and phone. Face to face meetings will be scheduled by appointment, on an as needed basis only. Messages can be relayed by utilizing Message to Management on our website, our Association Office at 951.769.7598 or by email to General Manager, Susan Larson slarson@keystonepacific.com If you've not yet signed up for eBlast notifications, please consider doing so at <https://soleraovg.com/sign-up-for-enews/>

Staff will continue increased cleaning routines to assist in minimizing exposure. The best way to prevent illness is to avoid being exposed to the virus. The Center for Disease Control (CDC) and the California Department of Public Health (CDPH) recommend the following everyday preventive actions to help prevent the spread of respiratory diseases. Updates and additional information on the COVID-19 virus can be found on the CDC website <https://www.cdc.gov/coronavirus/2019-ncov/index.html> and CDPH website at <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/ncov2019.aspx>

- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.
- Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty.
- Follow CDC's recommendations for using a facemask. CDC does not recommend that people who are well wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a healthcare facility).

Management will continue to monitor the COVID-19 situation and keep the community abreast of any changes to this emergency policy.
